You need know

IAKC need 0.00000002 ARO Per-Send  
Fee

transaction fee is 0.00000001 ARO

destination account receive  
0.00000001 ARO

So you have received 0.00000100  
ARO

If in the future  
you don't have aro to send iakc  
you can continue to request  
0.00000100ARO

why we need aro

Because iakc transactions are based  
on the Arionum Blockchain

So your iakc data is stored  
scattered all over the world

I know

Identity isolation

Encrypted messages permanently exist in the blockchain.

To prevent the risk of future private key leakage. the identity isolation address can be used.

when you delete the isolation address encrypted messages never be decrypted

my girlfriend

Process of buying ARO

The user wallet send 10 IAKC to the isolation address, and the isolation address send it to the Selling address. After the Selling address received 10 IAKC, automatically sends 0.00000100 aro There transaction between the user wallet and the isolation address, which is usually hidden in various daily transactions. If user need strong isolation, can use other methods to get ARO.

Selling address: iakc bet will set a selling address, allowing users to use iakc to buy 0.00000100 aro

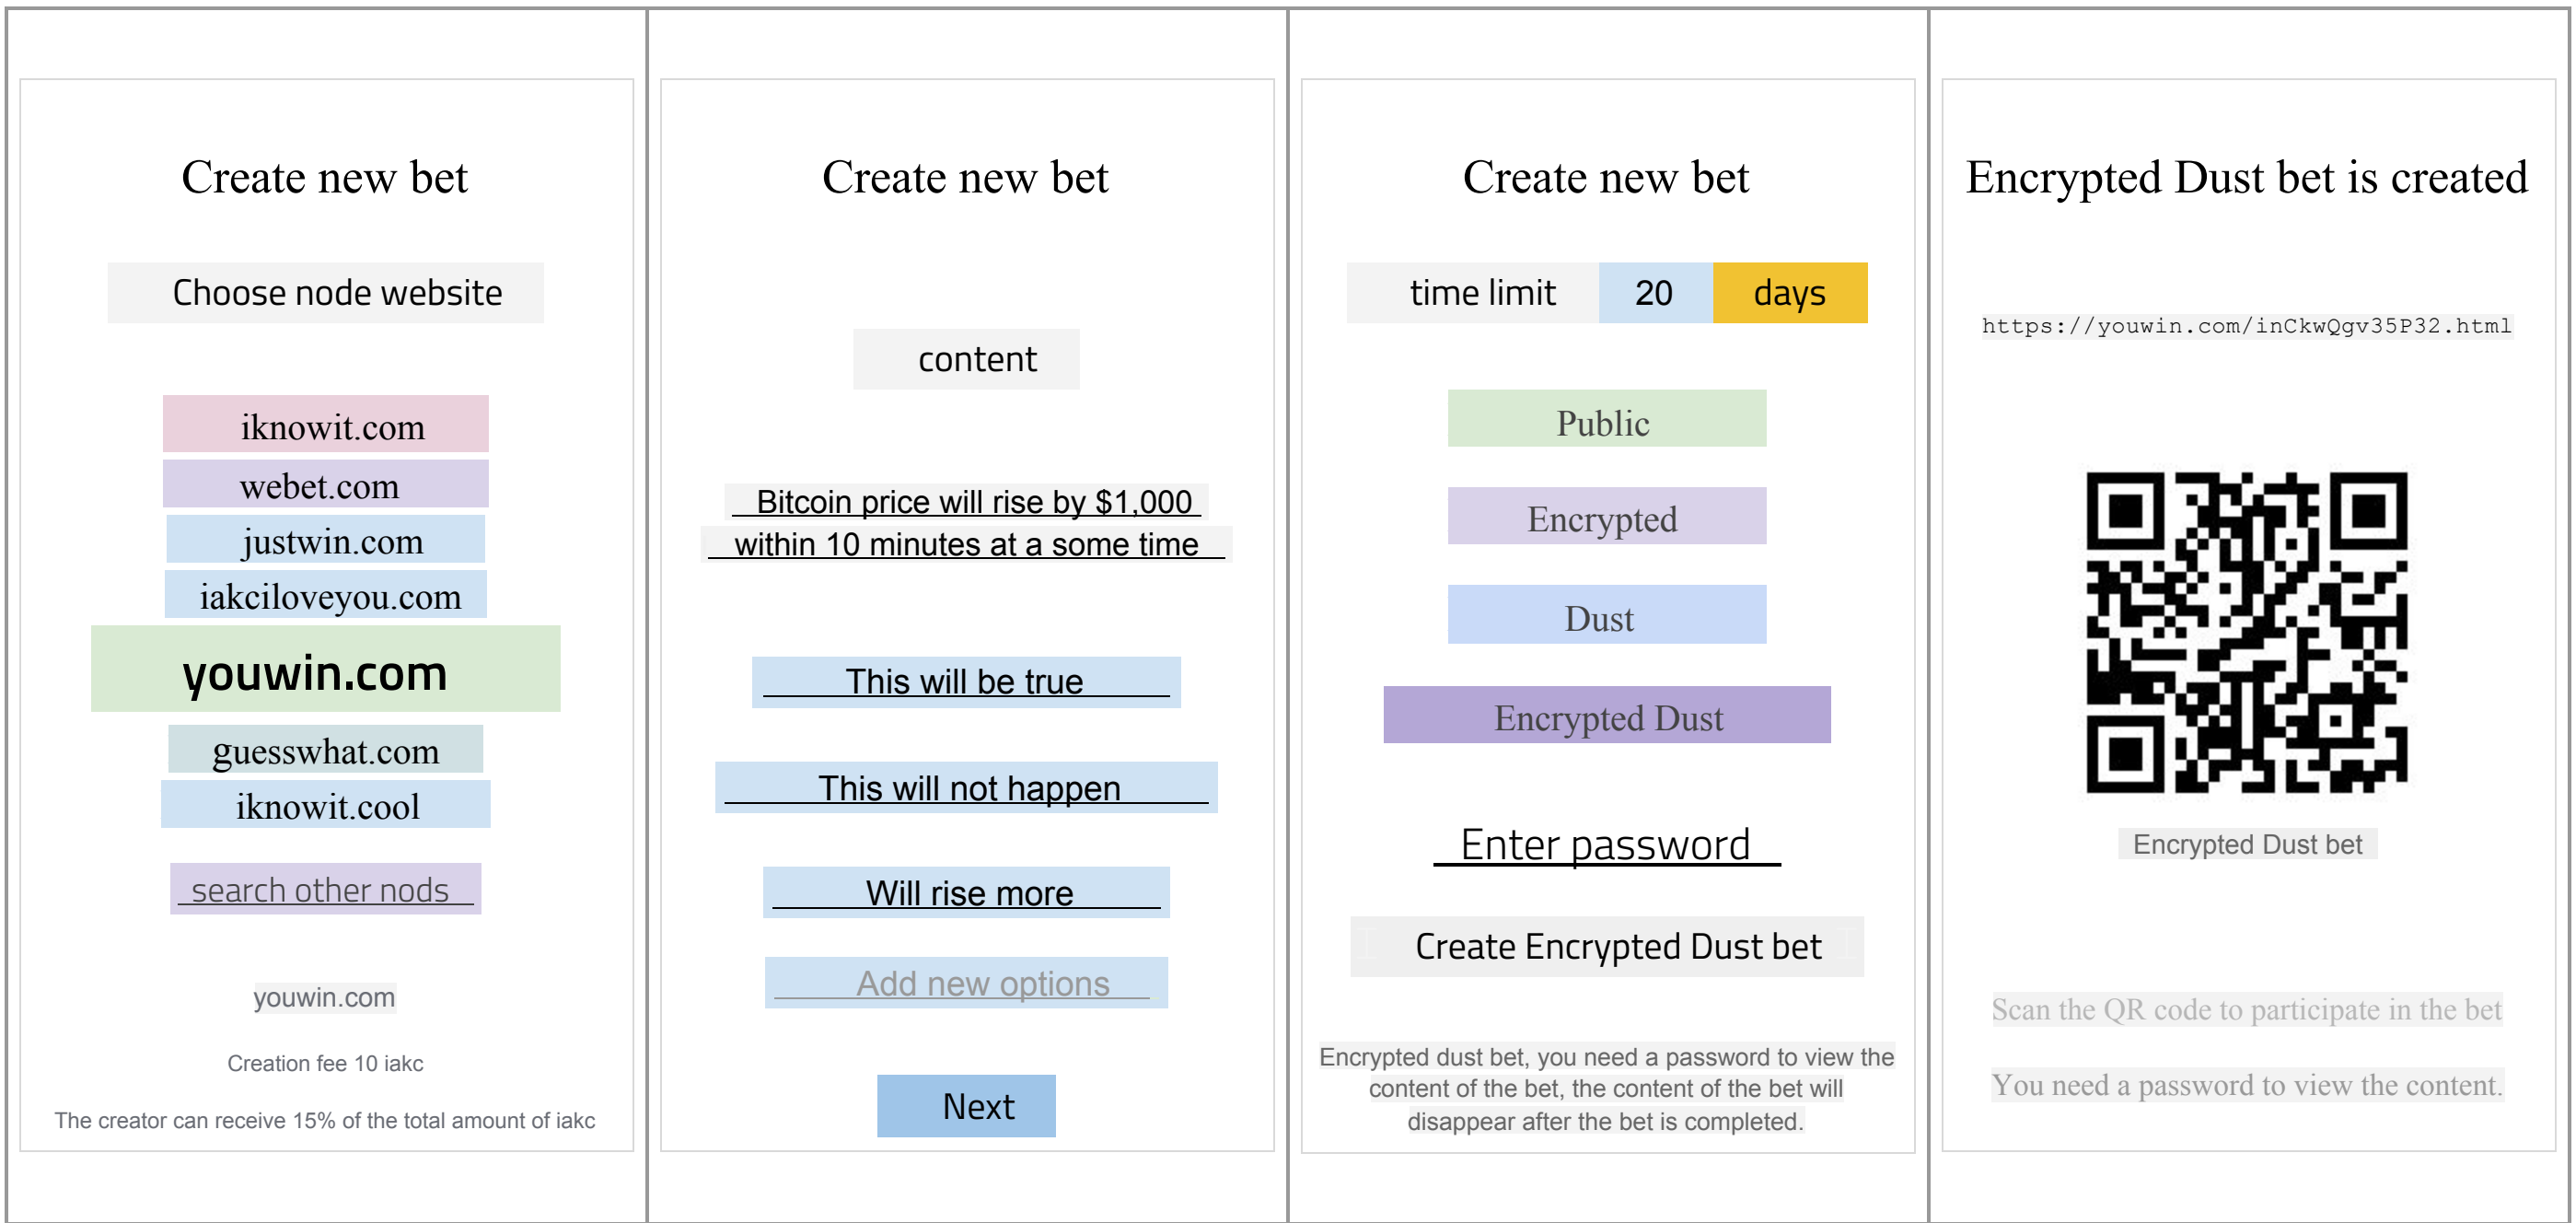

All encrypted messages will be on the Arionum blockchain, and the messages will arrive in the next block.

New message will appear the follow address.If the user does not follow, it will disappear after deleting the chat.  
The chat of the isolation address and the main address will appear in the follow address, and they can only be seen at the bottom of the chat interface respectively.  
Follow address and messaging function will become part of The account owner social platform.

This is an advertising space, The bet node needs to pay monthly,and can pay more to get a better ranking.
